Aero Dynamix and Shadin Avionics sign Strategic Agreement

Eules, TX – April 7, 2009 - Dennis Trout (Left), General Manager, Aero Dynamix, signs an exclusive agreement with Shadin Avionics to NVG modify the fuel management computers for Night Vision Equipment (NVE) compatible operation. Aero Dynamix will modify and inventory NVE compatible fuel computers to broaden their ever widening menu of services in support of the growth of rotorcraft upgrades to operate in Night Vision environments. Next to Dennis is Ed Gaines (Middle), Sr. Business Development Manager, Shadin Avionics and Mike Guinn (Right), Aero Dynamix, Repair Station Manager.

Aero Dynamix offers NVG modification and full repair/overhaul capabilities for all NVG modified items offered thru exclusive ADI - OEM agreements that ensure the factory warranty remains intact. ADI has developed FAA Approved NVG mod procedures for over 5,500 instruments, avionics and lighting accessories. The company also offers in house engineering and manufacturing departments that provides PMA Edge Lit Panels (ELPs) for most rotor wing aircraft models.

Shadin Avionics designs and manufactures a variety of digital fuel and altitude management systems, airdata computers, data converters, engine trend monitors and custom instrumentation enabling devices.
