Digiflo-L Operations Notice

This information letter is regarding Digiflo-L part numbers 91053X(T,P). This unit is designed to interface with a GPS receiver to give the pilot additional fuel information of NM/Fuel Unit, Fuel Reserve, and Fuel Unit to Destination. If the installer or operator has turned the GPS input off (I = 0 in the settings) this can cause the Digiflo-L to report erroneous information.

Fuel to Destination will indicate Left Engine Fuel Used

Fuel Reserve will indicate Right Engine Fuel Used

The GPS input is turned on in the factory (I = 1). This should not be changed. This information has been included in the recent revision of the operators guide (OP1053D) and is available on our website (www.shadin.com). For any questions regarding this please contact Shadin Avionics Customer Service at 1-800-388-2849.

Thanks,

Trevor Lund
Product Manager
